intravenous corporate offerings

INTRODUCTION

To IV Bar Vitamin Therapy

Intravenous vitamin therapy is part of a global movement towards holistic and preventive healthcare, wellness and longevity. By combining good nutrition, regular exercise, and IV vitamin therapy, we can significantly improve health, enhance appearance, alleviate stress and anxiety, and even bolster our body's defences against illness. It's a way of giving ourselves the extra care and attention we deserve!

What is Intravenous Vitamin Therapy?

Intravenous (IV) vitamin therapy involves administering medically approved vitamins and minerals directly into the bloodstream, maximising their benefits for health, wellness, beauty, immune support, gut health, mental clarity, longevity and sports performance and recovery. Unlike oral vitamins, IV therapy ensures 100% absorption, making it highly effective. All IV drips at The IV Bar are rigorously vetted, medically approved, and administered by skilled Registered Nurses to ensure safety and efficacy.

PERSONALISED CONCIERGE

Drip Service

Indulge in the ultimate luxury of wellness with our concierge IV vitamin therapy service. Say goodbye to hassle and hello to relaxation as we bring the goodness of IV vitamin therapy straight to you, wherever you are. Whether you're curled up in a ball suffering from a migraine, recovering from a wild night out, or simply want to treat yourself to some TLC, we've got you covered. Our mobile dripping team of registered nurses cater to your needs, ensuring you receive the revitalising benefits of IV drip therapy without ever leaving your home, hotel room, or office. Experience the convenience and rejuvenation of our mobile service, tailored to fit your lifestyle and wellness goals.

Benefits of IV Vitamin Therapy

IV vitamin therapy offers a wide range of benefits, including:

- Reducing stress and anxiety
- Improving energy levels and mood
- Alleviating fatigue
- Enhancing the appearance of skin, nails, and hair
- Improving mental clarity and memory
- Regulating sleep cycles
- Promoting healthier ageing and longevity
- Reducing pain and inflammation
- Strengthening the immune system
- Assisting in weight loss
- Easing menopausal symptoms
- Improving gut health and metabolism
- Enhancing sports performance and aiding muscle recovery
- Rehydrating and detoxifying the body
- Alleviating hangovers and jet lag

At The IV Bar, we are dedicated to helping our clients achieve their wellness goals through personalised IV vitamin therapy no matter where you are.

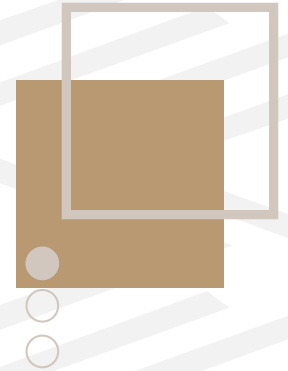

The Personalised Concierge Drip Service option is best suited to one-on-one or small groups at your home or hotel.

To book this option:

1. Reach out to your nearest IV Bar. Please check that the store listing includes a concierge icon. If you don't see this icon, it means the service isn't available at that location.
2. Booking in advance is necessary. We kindly ask for at least 24 hours' notice.
3. The availability of our concierge service depends on the availability of nurses and stock.

How does the cost work?

You'll need to pay for both the drip and a call-out fee, which varies based on travel distance. Your chosen store will give you a quote for the total cost.

CORPORATE CONCIERGE

Drip Service

Elevate your staff wellness and productivity with our tailored corporate-friendly approach. At The IV Bar, we understand that your employees are your greatest asset, and their well-being directly impacts productivity and success. That's why we prioritise efficiency, productivity, and overall well-being with our concierge IV vitamin therapy services, administered by medical professionals. By investing in your employee wellness program, you're investing in your company's success. Our convenient, on-the-go solution ensures that your employees have access to revitalising IV therapy wherever and whenever they need it, keeping them energised, focused, and ready to tackle any challenge. Give your team the competitive edge they deserve – because when it comes to business success, your well-being is the ultimate secret weapon.

How IV therapy can energise your team and boost workplace well-being.

Boosting employee wellness and productivity

IV drips can enhance overall health, immunity, and energy levels among employees. This can lead to reduced absenteeism due to illness and improved productivity.

Reducing stress and fatigue

Employees often face high-stress levels and fatigue, especially during busy periods or deadlines. IV therapy can help alleviate these symptoms, leading to better focus and morale.

Enhancing mental clarity and performance

Improved mental clarity and cognitive function resulting from IV drips can aid employees in making better decisions and performing tasks more effectively.

Supporting employee retention

Offering IV therapy as a wellness perk demonstrates that the company values employee health and well-being. This can contribute to higher job satisfaction and retention rates.

Promoting a positive corporate culture

Providing wellness initiatives like IV vitamin therapy can foster a positive corporate culture centred around employee health, which can attract top talent and improve overall company reputation.

Addressing specific health needs

IV drips can be tailored to address specific health concerns of employees, such as boosting immune function during flu season or aiding in recovery after strenuous periods of work or travel.

Convenience and accessibility

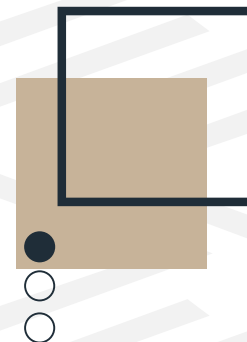

By arranging for IV drips onsite, companies make it convenient for employees to access wellness treatments without needing to leave the workplace.

Overall, integrating IV vitamin therapy into corporate wellness programs can lead to healthier, happier, and more engaged employees, ultimately benefiting both individual well-being and organisational success.

The **Corporate Concierge** option is perfect for one-on-one sessions or small groups at work. It's also ideal for wellness days and events like golf outings, team-building activities, padel games, or even at the gym.

For quotations and to discuss customised packages and group discounts, feel free to reach out to office@theivbar.co.za.

WE'D BE HAPPY TO HELP!

EVENT CONCIERGE

Drip Service

Enhance your event with our exclusive concierge IV therapy services. At The IV Bar, we offer a premium experience that keeps your guests refreshed and revitalized throughout the occasion. Our on-site IV vitamin therapy, administered by registered nurses, provides a touch of well-being right at your event. Whether it's a corporate gathering, music festival, or special celebration, our tailored service ensures that your guests remain energized and focused, enhancing their overall experience. Make your event unforgettable by offering a unique wellness perk—because when it comes to creating a standout wellness event, guest comfort is key.

IV vitamin therapy at events like music festivals and pop-ups offers several benefits:

1. Rapid Rehydration

Festivals and pop-ups often involve long hours of activity and exposure to the elements. IV therapy provides quick rehydration and helps combat dehydration more effectively than oral fluids alone.

2. Instant Nutrient Boost

It delivers essential vitamins and minerals directly into the bloodstream, ensuring faster and more efficient absorption, which helps attendees feel revitalised and energised.

3. Alleviates Fatigue

The physical and mental demands of high-energy events can be exhausting. IV therapy helps combat fatigue and restores energy levels, allowing participants to stay active and enjoy the event fully.

4. Enhances Recovery

For those who may overindulge or feel run down, IV therapy aids in faster recovery, reducing hangover symptoms and supporting overall well-being.

5. Boosts Immune Function

Events can expose individuals to a variety of germs. IV vitamin therapy can help strengthen the immune system, offering an added layer of protection.

6. Convenience and Comfort

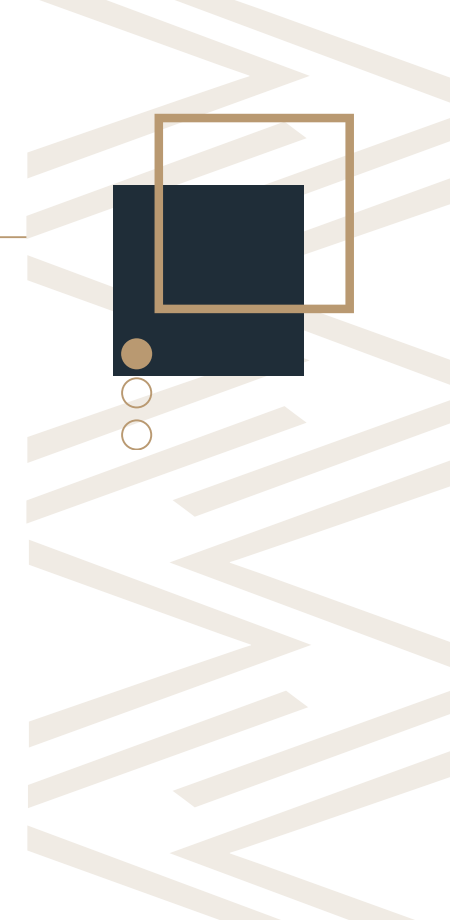

Providing on-site IV therapy services at events makes it easy for attendees to get the benefits they need without having to leave the venue, ensuring they can stay comfortable and enjoy the experience.

7. Creates a Unique Experience

Offering IV therapy can enhance the event's appeal by providing a distinctive and premium service, contributing to a memorable and positive attendee experience.

By integrating IV vitamin therapy into events, organisers can add value, enhance guest satisfaction, and support attendees in having a healthier, more enjoyable experience.

LONGEVITY & PERFORMANCE

Additional Services

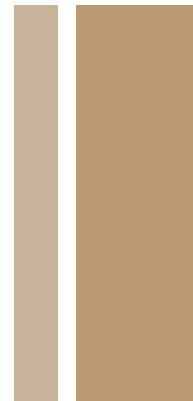

RETHINK RECOVERY

with compression therapy

You need recovery in your life, plain and simple. You think you're crushing it in the gym? Think again. Recovery is your secret weapon to promote healthy circulation, reduce inflammation and muscle soreness, and promote proper lymphatic drainage. Compression therapy can help those who are active, have a physically demanding lifestyle, are on their feet all day, experience sore muscles, or have an acute injury.

Add 30 minutes of compression therapy during your drip treatment.

Cost: N\$300

DRIP BY DESIGN with DNA testing

At The IV Bar, we're all about empowering you to make informed decisions about your health. One of the ways we do this is by offering you a solution to know exactly which drips are best for you, based on your DNA.

By using the DNA Core test from DNAnalysis, we can give you a revolutionary backstage pass to a healthier, more tailored drip life. Now you can really know what's best for you!

You also get a personalised roadmap to optimise four key areas of your well-being – and through the process, we'll identify which IV drips will turn you into a wellness superstar. All thanks to your DNA make-up!

By unlocking your genetic code, you gain insights into your health that will last a lifetime. Your DNA never changes, and neither will the wisdom you get from the DNA Core test.

Cost: N\$5500

includes DNA test, courier fees for blood sampling to lab, and a one hour consultation with our Nutritionist, which includes feedback on your DNA test, as well as a personalised plan for your nutrition, exercise and dripping needs. ***Note: the online consultation takes place once lab results are received, +- 3 weeks after the DNA test.***

intravenous vitamin therapy

HOW IT ALL STARTED

Founded in January 2018 by Keri Rudolph, The IV Bar was born out of her passion for the benefits of IV therapy. Keri envisioned a welcoming environment that blends the comfort of a slow lounge with the energy and efficiency of a Starbucks, ensuring a pleasant experience for all our clients.

OUR MISSION

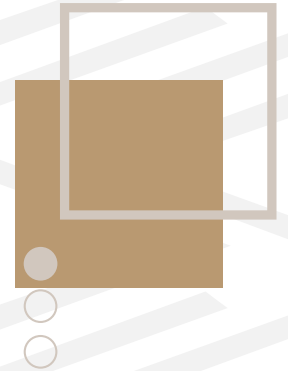

At The IV Bar, our mission is to provide medically approved intravenous vitamin drips that enhance our client's appearance, well-being, and performance. Since launching our franchise program in September 2019, we've expanded our commitment to delivering exceptional service and care across multiple locations. Our core values include an obsessive dedication to client service, prioritisation of people over profits, utilisation of the safest, medically approved drips administered by compassionate nurses with an exemplary couch-side manner, commitment to transparency and accountability, and the cultivation of a supportive IV Bar family and community. These principles guide us in delivering the highest standard of care and customer experience, ensuring every visit to The IV Bar is beneficial and enjoyable for our valued clients.
